SUMMARY

Final-year B.E. (Electronics & Computer Engineering) student at PICT, Pune (CGPA 8.78) and Java Backend Developer who builds projects around **Spring Boot**, **Machine Learning**, and **Deep Learning**. Experienced in REST APIs, JPA/Hibernate, MySQL/PostgreSQL and LLM API integration. Strong in DSA and OOP (1500+ LeetCode rating).

EDUCATION

CGPA: 8.78 **HSC:** 79.17% **SSC:** 95.80%

TECHNICAL SKILLS

Languages:	Java (Primary), Python, C, JavaScript, SQL
Backend:	Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs
ML/DL:	Machine Learning, Deep Learning, Neural Networks, CNN, scikit-learn, TensorFlow, Keras, Pandas, NumPy, Matplotlib
Frontend:	React.js, HTML, CSS
Databases:	MySQL, PostgreSQL, MongoDB, MongoDB Atlas
Cloud & IoT:	AWS IoT Core, MQTT, IoT Device Management, Railway
Tools:	Git, GitHub, Postman, Swagger/OpenAPI
Core CS:	Data Structures & Algorithms, OOP, DBMS, RESTful Web Services

EXPERIENCE

AWS IoT Cloud Engineer Intern *(AICTE – EduSkills Virtual Internship)* *Jan 2026 – Mar 2026*

- Built an **IoT Device Management Dashboard** on **AWS IoT Core** in 3 months, managing **10** simulated devices across **5** Thing Groups over **MQTT**.
- Secured device connectivity with X.509 certificates and **XX** IoT policies, enforcing least-privilege access for cloud-to-device communication.

Full Stack Web Development Intern *(In-House Internship)* *Sep 2024 – Sep 2025*

- Designed **d**atabase tables/collections (**SQL/NoSQL**) for a college website serving **s**tudents and faculty, in a 14-member team over 12 months.
- Integrated database services with frontend and backend teams across modules, ensuring efficient data access and consistency.

PROJECTS

Placement Prep | *React 18, Spring Boot 3, Java 21, PostgreSQL, Spring Security* GitHub |Live Demo

- Solved the gap where students have **many resources for learning but few platforms for structured practice** by building a unified platform that combines **Aptitude, CS Fundamentals, and DSA** in one place.
- Engineered the full-stack application with a **19-topic** DSA tracker; deployed on **Vercel** (frontend), **Render** (backend), and **Supabase** (database).
- Developed a **random test generator** that creates **10-question** balanced tests (4 Easy, 4 Medium, 2 Hard) and custom tests of **10/20/30 questions** by section and difficulty, with a **5-minute** countdown, auto-submit, and instant results with explanations.
- Created an **Admin Portal** with question bank CRUD, **CSV/Excel bulk upload** with row-level validation, and student management, serving a bank of **300**+ questions.

Credit Risk Assessment with Explainable AI (SHAP) | *Python, XGBoost, scikit-learn, SHAP, Pandas, NumPy, FastAPI* GitHub | Live Demo

- Built an end-to-end **machine learning** pipeline on **32,581 loan records** for default prediction, with **EDA**, outlier removal, median imputation, one-hot encoding via **ColumnTransformer**, and class-imbalance handling (**21.8%** defaults) using `scale_pos_weight`.
- Benchmarked **Logistic Regression, Random Forest, and XGBoost** with **5-fold stratified cross-validation**, tuned with **RandomizedSearchCV**, and reached **ROC-AUC 0.94+**; optimized the decision threshold to **0.285** (F1/PR-curve) and applied **Platt calibration** validated with Brier score.

- Applied **Explainable AI (SHAP TreeExplainer)** for global and per-applicant explanations, finding loan-to-income ratio and interest rate as the top default drivers, and analyzed **258 false positives and 256 false negatives**.
- Deployed the model as a **FastAPI** REST API with Pydantic validation and Swagger docs, plus an interactive web dashboard, hosted on **Render**.

CLUBS & SOCIETIES

- **Debating Society (DebSoc):** Member of the society engaged in debates, discussions, and public-speaking activities to enhance critical thinking and communication.

ACHIEVEMENTS

- Achieved a 2-Star rating on CodeChef and a 1500+ contest rating on LeetCode through regular participation in competitive programming.
- Solved 250+ Data Structures and Algorithms problems across LeetCode, GeeksforGeeks, and CodeChef, strengthening problem-solving and algorithmic skills.

CERTIFICATIONS

- **Infosys Springboard – Basics of Python** – Completed training in Python fundamentals, programming concepts, and problem-solving.
- **AWS IoT Cloud Engineer Virtual Internship – AICTE EduSkills** : Completed a virtual internship focused on AWS IoT Core, MQTT, IoT device management, and cloud-based IoT solutions.
